In 2009, the Fossil Dig Adventure Tours had a 100% success rate in uncovering 'new' fossils!

Welcome to an unforgettable adventure with the Canadian Fossil Discovery Centre (CFDC).

The CFDC is dedicated to educating and challenging the minds and imaginations of individuals. We invite you to join us in exploring the geological and paleontological history of Southern Manitoba.

Your Tour begins at the CFDC with learning about the prehistoric geography of southern Manitoba and the wondrous life that existed here. A Guided Museum Tour features "Bruce", a 13m (43ft) Mosasaur and other marine creatures of the Late Cretaceous Seas – from plesiosaurs to ammonites and sharks. The Tour includes rock types and their roles with fossils. You will learn about fossil collecting techniques, fossil identification and the significance of fossils.

In our CFDC van, you will be taken to our dig site, a 20 minute drive from the Centre on the Manitoba Escarpment, where you will have the opportunity of exploring and excavating an 80 million year old sea floor. You will be part of a discussion on rock and mineral formation, the use of tools and the history of the dig site.

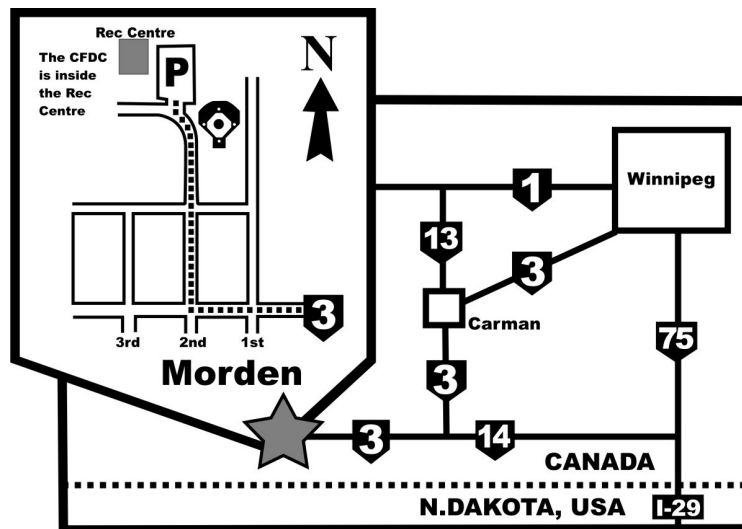

Feel free to bring in any fossils or rocks you've always wanted identified.
