In 2009, the Fossil Dig Adventure Tours had a 100% success rate in uncovering 'new' fossils!

Welcome to an unforgettable adventure with the Canadian Fossil Discovery Centre (CFDC).

The CFDC is dedicated to educating and challenging the minds and imaginations of individuals. We invite you to join us in exploring the geological and paleontological history of Southern Manitoba.

Your adventure begins at the CFDC with a Guided Museum Tour as you learn about the prehistoric geography of southern Manitoba and the wondrous life that existed here. The Tour features "Bruce", a 13m (43ft) Mosasaur and other marine creatures of the Late Cretaceous Seas – from plesiosaurs to ammonites and sharks. The tour includes rock types and their roles with fossils. You will learn about fossil collecting techniques, fossil identification and the significance of fossils.

In 2010, the CFDC is offering the 5 Day Fossil Dig Adventure Tour program every week in the months of June, July & August. Participants will experience a fossil excavation program and field study **with a CFDC paleontologist**.

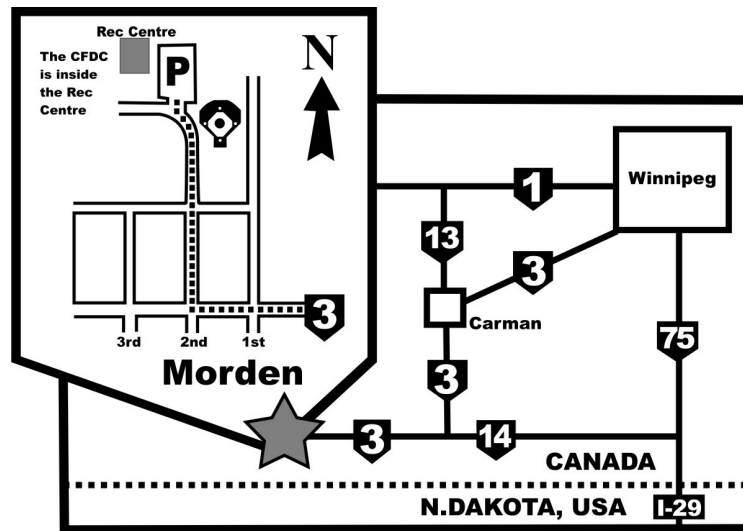

In our CFDC van, you will be taken to our dig site, a 20 minute drive from the Centre on the Manitoba Escarpment, where you will have the opportunity of exploring and excavating an 80 million year old sea floor. Included is a discussion on rock and mineral formation, the use of tools and the history of the dig site.

Feel free to bring in any fossils or rocks you've always wanted identified.

ADDITIONAL INFORMATION

- **All participants must sign liability waiver forms.**
- Participants must be 14 years of age or over
- Maximum of 7 people per excursion. Smaller groups may be combined with others.
