The Canadian Fossil Discovery Centre is dedicated to educating and challenging the minds and imaginations of individuals. We invite you to join us in exploring the geological and paleontological history of Southern Manitoba.

Your ½ Day Fossil Dig Adventure Tour begins at the Canadian Fossil Discovery Centre (CFDC) with an explanation of how this area was once submerged beneath an ancient sea. The tour features "Bruce" a 13m (43ft) Mosasaur along with many other marine creatures of the late Cretaceous Seas – from plesiosaurs to ammonites, sharks, rock types and their roles with fossils. You will learn about fossil collecting techniques, identification and the significance of fossils.

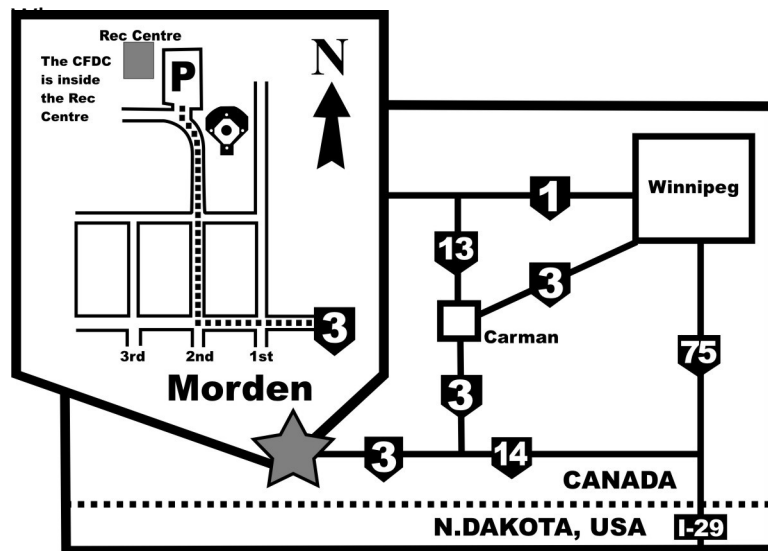

In our CFDC van, participants are transported to our dig site, a 20 minute drive from the museum on the Manitoba Escarpment, where you will have the opportunity of exploring and excavating an 80 million year old sea floor, after a discussion on rock and mineral formation, use of tools and the history of the dig site.
